FROM: J.P. WALKER, SERGEANT
SECURITY HOUSING UNIT #1

On March 26, 1984 I conducted a Cell search of Cell #9 solely occupied by inmate Bouville, B-89067 in the Security Housing Unit #1.

During the course of the search I discovered that the top strapping metal was missing. The missing piece measured approximately 44".

On April 10, 1984 you instructed me to have D.W. Hilmer remove all the strapping metal from Cell #9. At approximately 1400 Hrs. Mr. D.W. Hilmer informed me that he had finished the job. At 1430 Hrs. I instructed C/O S.A. Bamacher to take the strapping metal to the A.W.O. Office and process it in accordance to institutional policy.
